V. Pre-Election, Pre-Tabulation, Post-Election Test Observation and Verification

The Panel meets at the office of the County Clerk approximately 1 week prior to the election for a brief orientation, and to observe and verify the pre-election logic and accuracy tests. The Panel is presented with an overview of the election process, including ballot tabulation.

The Panel reconvenes on election day at approximately 4:00 p.m. to observe and verify the pre-tabulation logic and accuracy tests – required prior to processing absentee ballots. Panelists may remain in the office through the evening, or leave the office and return at 8:00 p.m. to observe all aspects of the vote tallying process. At the conclusion of ballot tabulating on election night, the panel observes and verifies the post-election logic and accuracy tests, which are performed after all ballots have been tabulated on election night.

The Panel is required to return to observe and verify the logic and accuracy tests

before and after ballots are processed during canvass. Panelists may observe any processes during the Official Canvass. To the extent possible, the Panel is comprised of the same members at all testing opportunities.

VI. Mechanism for Feedback

Panelists are asked to complete a feedback form concerning the ballot testing and tabulation processes, and have the opportunity to evaluate any other aspects of the administration of the election.
