Everyone Counts is the leading provider of new developments in voting and election administration. We provide proven and trusted transparent, secure and accessible voting systems, ensuring that every registered voter has access to a secure ballot, reliably counted.

The MOVE Act is based, in part, on our successful work over the past several years with secure e-delivery of ballots to military and overseas voters in Australia, in the UK and in the US. MOVE raises the bar for security and accessibility for voters. Email and faxing of ballots was an emergency stop-gap for serving voters. Neither email nor fax provides the security and privacy that MOVE requires. New leadership at FVAP has now committed to establishing the higher standard for accessibility, security and privacy for voters living and serving abroad that MOVE requires. The State of California, should consider the proven, accessible, secure and transparent voting systems from Everyone Counts, a company based in San Diego, California for complying with MOVE.

Everyone Counts is a team of internationally recognized election and computer security experts that have successfully worked with governments to help them increase counted ballots from soldiers serving in Afghanistan and Iraq to 75% from 23% when only paper and mail were offered. And we helped Democrats Abroad increase registration for the 2008 Presidential primaries 7-fold by offering a secure online voting channel for US citizens living and serving abroad. More than 50% of voters chose to vote online.

It has been proven time and time again that secure channels for increasing access to voters, whether by secure e-delivery and e-marking of ballots or full online voting, are available for and in demand by voters. We strongly encourage the Secretary of State to explore proven solutions that other states and countries are currently procuring for their voters for California voters. California voters deserve to be counted. And Everyone Counts, a California company, can help the office of the Secretary of State make that happen.

Best Regards,

Katie Jensen
